

JAVERIA IRFAN

AI AUTOMATION ENGINEER | AI AUTOMATION EXPERT

Remote – Pakistan (US Time Zone) | javeriairfan468@gmail.com | BSCS, Sukkur IBA University

PROFESSIONAL SUMMARY

Results-driven AI Automation Engineer with 3+ years of experience designing, training, and deploying machine learning and deep learning models alongside AI-powered automation systems, intelligent workflows, and data pipelines for real-world business operations. Hands-on expertise in Python, PyTorch, TensorFlow, Keras, CNNs, RNNs, n8n, Make.com, Zapier, Go High Level (GHL), FastAPI, OpenAI API, and LangChain. Currently at Yurocket building client funnel websites, automating hiring pipelines, and improving existing automation products. Previously reduced manual work by 90% and accelerated financial workflows by 70% at Bex Solution. Experienced in end-to-end ML pipelines from data preprocessing and feature engineering to model training, evaluation, and production deployment.

CORE TECHNICAL SKILLS

- **AI Automation & Workflow Tools:** n8n, Make.com (Integromat), Zapier, Power Automate, AI workflow orchestration
- **AI & LLM Technologies:** OpenAI API, Claude API, GPT-4, LangChain, AI Agents, Prompt Engineering, RAG Pipelines
- **Programming & Backend:** Python, FastAPI, Node.js, JavaScript, HTML/CSS, REST APIs, GraphQL, Webhooks, OAuth2, JWT
- **Data & AI Processing:** OCR (Tesseract, OpenCV, pdfplumber), NLP, Hugging Face Transformers, PyTorch, TensorFlow, Keras, Scikit-learn, CNNs, RNNs, NumPy, Pandas, Matplotlib, Seaborn
- **Databases & Cloud:** PostgreSQL, MySQL, MongoDB, Supabase, SQLAlchemy, SaaS integrations
- **Automation Integrations:** QuickBooks Online, Jobber, Jira, Workday, Google Workspace API, Microsoft Graph API
- **DevOps & Deployment:** Docker, GitHub Actions, CI/CD, API deployment and monitoring
- **Soft Skills:** Remote collaboration, problem-solving, technical documentation, Agile workflows

PROFESSIONAL EXPERIENCE

AI Automation Engineer | Yurocket (Remote)

April 2025 – Present

- Developing and managing AI-powered automation workflows using Zapier, n8n, and Make.com to streamline business operations and reduce manual overhead across client projects.
- Built and launched client funnel websites using Go High Level (GHL) with custom HTML, CSS, and JavaScript code alongside GHL's native UI builder, including full pipeline setup, landing pages, CRM configuration, and integrated multi-location calendars for seamless appointment booking across client locations.
- Automated end-to-end hiring processes using GHL and automation tools, covering candidate intake, screening workflows, notifications, and follow-up sequences.
- Reviewed, debugged, and enhanced logic of existing automation products, improving reliability, performance, and scalability of live client-facing workflows.

AI Product Builder & AI Automation Engineer | Bex Solution (Canada – Remote)

October 2023 – March 2025

- Designed and deployed AI-powered automation workflows using n8n, Python, APIs, and webhooks to automate financial operations, customer workflows, and business processes.
- Built AI agents and intelligent assistants using OpenAI API, Claude API, and prompt engineering techniques for content automation, document processing, and workflow optimization.
- Integrated SaaS platforms including QuickBooks, Jobber, Workday, Jira, Google Workspace, and Microsoft Graph API into centralized automation ecosystems.
- Developed intelligent OCR and NLP pipelines that extracted and transformed unstructured PDF data into structured business databases with 90% reduction in manual data entry.
- Engineered a bi-directional Jobber ↔ QuickBooks automation system using Python, n8n, MySQL, MongoDB, GraphQL APIs, and webhooks to sync CRM and ERP data in real-time, improving financial workflow speed by 70%.
- Implemented secure authentication and automation middleware using OAuth2, JWT, RBAC, and Okta SSO for enterprise workflow systems.
- Monitored, tested, and optimized AI workflows for scalability, reliability, and reduced operational costs.
- Created technical documentation, automation runbooks, and deployment guides while working independently in remote Agile environments.

Data Science Intern | CypherMatrix Technologies Pvt Ltd

August 2023 – September 2023

- Designed and trained machine learning and deep learning models using PyTorch, TensorFlow, Keras, and Scikit-learn, achieving 88% prediction accuracy; applied CNNs and RNNs for structured and sequential data tasks.
- Developed analytical dashboards and automated data processing scripts using Python and visualization tools.

SELECTED AI AUTOMATION PROJECTS

- **Intelligent Document Processing Agent:** Built an AI-powered automation agent using Python, OCR, OpenAI-powered classification, and QuickBooks integrations to process scanned invoices and automate accounting workflows.
- **AI Content Automation Workflow:** Created a multi-step AI content generation and publishing system using OpenAI API, WordPress, n8n, and Make.com, reducing content creation time by 50%.
- **Jobber ↔ QuickBooks AI Automation System:** Designed a real-time two-way CRM/ERP data synchronization workflow using GraphQL APIs, REST webhooks, Python, n8n, and MongoDB with automated error handling and monitoring.
- **Secure HRIS Automation Middleware:** Developed enterprise-grade workflow automation integrating Workday, Jira, and Okta SSO with automated user provisioning and role-based access control.
- **Automated Email Scheduler (Node.js):** Built a Node.js application to schedule and send automated emails on custom monthly dates and times across multiple Gmail accounts, with full CRUD functionality for managing schedules and recipients.

EDUCATION

Bachelor of Science in Computer Science (BSCS) | Sukkur IBA University
